Continuation of 5. does NOT place the a cation in condition for allowance because: the oly does not overcome the final rejection which explained clearly in the final rejection that it is obvious to a person having ordinary skill in the art to modify King's patent in view of Frederiksen's patent by combining the Subscriber Identity Module (SIM card) in a cellular phone in order to expand the dictionary to provide additional matching words. In addition, examiner took Offical Notice that managing operations for user-defined lists were well known in the art so that managing operations in King's system can maintain the user-defined lists of words; therefore, claims 1-6 and 11-12 are still valid under the above rejections.
